

# Sustainability in Scranton

## Residence Hall Competition

### Spring 2007

All buildings are using half of what they used prior to the 2005 water conservation project.

Redington Hall is doing the best job recycling out of our test group

McGowan is using the least amount of electricity per student.

Gavigan Hall is using the least amount of natural gas for heating. Following thermostat adjustments in Redington a nearly 15% decrease in heat usage was noticed.

If you are interested in having your residence hall participate in the Fall 2007 Sustainability Competition, please contact Mark R. Murphy, University Engineer at [murphym1@scranton.edu](mailto:murphym1@scranton.edu)
