

**WML ASSESSMENT ACTIVITY REPORT – OT 393**  
**Bonnie Oldham – Submitted 3/1/2015**

Institutional Learning Outcomes*	WML Learning Outcomes**	WML “Projects”	Assessments	Resulting Actions (Closing the Loop)
Develop and use the intellectual and practical competencies that are the foundation of personal and professional development and lifelong learning including oral and written communication, scientific and quantitative reasoning, critical analysis and reasoning, and technological competency and information literacy.	Students will investigate differing viewpoints that they encounter in their investigation of topics <i>in order to</i> be able to defend or counter specific points-of-view.			
Exhibit broad knowledge of the human condition, understanding the world in its physical and natural aspects, as well as the philosophical and theological basis for modern thought, faith and belief.	Students will gain insight and understanding about diverse sources of information <i>in order to</i> evaluate and use resources appropriately for their information needs.			
Demonstrate competence in their chosen field of study, using the knowledge and ability to address the most significant questions, and advancing towards positions of leadership.	Students will identify the appropriate level of scholarship among publication types (scholarly journals, trade publications, magazines, or websites) <i>in order to</i> match the requirements of their assignments.	OT 393: Research Methods in OT (3 sections, Cote & Brady Spring 2015)	During Spring 2014, given an article, 82% of the students were able to recognize whether or not it was a research study.	During Spring 2015, I revised my lesson plan so that students were tested in close proximity to when this information was presented rather than at the end of the class, which resulted in 100% of the students being able to recognize whether or not a given article was a research study.
	Students will articulate the key elements in their research questions <i>in order to</i> match the requirements of their assignments.			
Employ their knowledge and intellect to address situations in a way that demonstrates a devotion to the spiritual and corporal welfare of other human beings and by a special commitment to the pursuit of social justice and the common good of the entire human community.	Students will properly distinguish between their own ideas and the intellectual property of others <i>in order to</i> ethically use information and demonstrate academic integrity.	OT 393: Research Methods in OT (3 sections, Cote & Brady Spring 2015)	Discussion of the importance of paraphrasing properly.
